NISHAD RASHID MAHI

Business Data Analyst | SQL · Python · Power BI · Tableau · Data Quality · Requirements Analysis

Burnaby, BC | +1 (236) 234-6244 | mahinrashid34@gmail.com | LinkedIn | GitHub | Portfolio

SUMMARY

Senior Business Analyst with an MBA in Business Analytics and PMP certification who connects business stakeholders with data. I gather requirements, build ETL pipelines and SQL reporting, design Power BI and Tableau dashboards and run user acceptance testing, and I audit data before trusting it: in five public portfolio projects, that audit changed the main conclusion four times. Backed by 4 years of KPI ownership in high-volume retail operations at Walmart Canada.

SELECTED ACHIEVEMENTS

- Lead a **138-associate e-commerce fulfillment department** to a **#1 regional ranking across all metrics**, multiple times
- Deliver sales forecasts and trend reporting for **500+ customer accounts** that steer what the sales team promotes
- Caught data defects that changed business conclusions: **27% of booked revenue** never collected, a cancellation rate of **14.2%, not 8.9%**, and **33% of dates** silently corrupted

TECHNICAL SKILLS

Data Analysis: SQL (joins, CTEs, window functions), Python (pandas, matplotlib, scikit-learn), hypothesis testing, correlation
BI & Reporting: Power BI, Tableau, Excel (pivot tables, XLOOKUP), KPI dashboards, recurring and ad-hoc reporting
Data Quality & ETL: ETL pipelines, data profiling, validation and reconciliation, integrity checks, de-duplication, quality logs
Business Analysis: Requirements gathering, data flow and process mapping (Visio), UAT, root cause analysis
Delivery & Tools: PMP, Agile/Scrum, Jira, ServiceNow, HubSpot, Workday, SharePoint, Git/GitHub, Microsoft Azure

DATA ANALYTICS PROJECTS

Where Is the Money Going? Revenue Leakage & Customer Retention | SQL, Python, Power BI **2026**

GitHub · *138K orders, 25K customers, synthetic multi-country retail dataset*

- Reconciled booked, completed and collected revenue and found **27% of $177M in booked revenue never became cash**, including $14.3M in unpaid "Completed" orders
- Ran a SQL data quality audit (referential integrity across 4 tables, order headers reconciled to line items) that flagged 11,226 mismatched orders
- Showed flat revenue hid a **97% drop in new-customer acquisition**; recommended a 30% discount cap (**+$1.44M profit**) and a win-back campaign, tracked in a Power BI executive dashboard

Who Funds UK Political Parties? Data Quality & Funding Risk Review | Python, SQL, Tableau **2026**

GitHub · Live Tableau dashboard · *65,278 records, £1.09B, Electoral Commission public register*

- Proved Excel had silently swapped day and month on **33% of dates**; the fix removed **95% of "impossible" records** (9,800 → 444), with **zero records lost**
- Merged **942 duplicate donor names** (£386M) and separated £164M of public funding mislabelled as donations, documenting every rule in a data quality log
- Used SQL (CTEs, window functions, concentration index) and an interactive Tableau dashboard to show three parties rely on their top 10 donors for over 55% of private funding

Amazon.in Apparel Seller: Operations & Stock Review | Python, SQL, Power BI **2026**

GitHub · *128,975 order lines joined to a 9,170-SKU stock report (Kaggle)*

- Found an earlier cleaning step had wrongly deleted 7,795 rows; restoring them showed the true cancellation rate is **14.2%, not 8.9%**, and net sales **₹69.7M, not ₹78.6M**
- Joined sales to stock by SKU (94% match) and found **25% of revenue sat on under two weeks of stock** while 70% of stock units barely sold; tested fulfilment options with a two-proportion z-test

Walmart Store Sales: What Actually Drives Sales? | SQL, Python, Excel, Tableau **2026**

GitHub · Tableau dashboard · *public Kaggle dataset, 2010–2012: 45 stores, 6,435 store-weeks, $6.74B*

- Found the source holiday flag **misses the biggest sales week of the year** (+70%); a corrected field showed sales are driven by the calendar and a few stores, not the economy

Maternal Health Risk: A Screening Model, Tested Honestly | Python, scikit-learn, Tableau **2026**

GitHub · *1,014 patient records, UCI Machine Learning Repository*

- Found **55% of rows were exact duplicates**, inflating model accuracy from a realistic 72% to 81%; tuned a screening threshold that cut missed high-risk cases from **25 of 112 to 4 of 112**

PROFESSIONAL EXPERIENCE

Amader Cart | Remote (Sylhet, Bangladesh) **May 2025 – Present**

Senior Business Analyst **Sep 2026 – Present**

Business Analyst **May 2025 – Aug 2026**

- Build sales forecasts and trend reports for **500+ customer accounts** using SQL, Excel and Power BI, showing the sales team which online services to promote based on demand
- Analyze account spending and usage data to flag customers paying for underused services, recommending right-sized plans that reduce overspend and strengthen retention
- Gather and document business and data requirements from sales, product and engineering teams; take part in Agile sprint planning and backlog grooming
- Build ETL pipelines and automated Power BI and Excel dashboards for leadership, validating data before it reaches reports and replacing manual data pulls
- Write and execute **user acceptance test plans**, log defects in Jira, and investigate recurring workflow issues to recommend process fixes

Walmart Canada | Vancouver, BC **Oct 2022 – Present**

OMNI Department Manager, E-Commerce Fulfillment **Feb 2026 – Present**

- Track daily fulfillment KPIs (order-picking accuracy, on-time fulfillment) for a **138-associate department**, leading it to a **#1 regional ranking across all fulfillment metrics** multiple times
- Analyze performance trends to find root causes behind missed targets, and present findings and recommendations to store leadership
- Plan labour for 138 associates and 16 trainers against daily targets; user-tested rollouts of updated logistics software and track issues in ServiceNow and Jira

Customer Service Manager **May 2024 – Jan 2026**

- Analyzed customer feedback data to pinpoint service gaps and built targeted retraining; tracked results against targets, contributing to **150+ membership sign-ups**

Customer Service Desk Associate / Self-Checkout Attendant / Cashier **Oct 2022 – Apr 2024**

- Resolved point-of-sale billing discrepancies and app errors across 100–150 interactions per shift; **promoted twice in under 2 years**

Ibrahim and Brothers | Sylhet, Bangladesh **Aug 2021 – Sep 2022**

Assistant Manager (promoted from Trainee Assistant Manager) **Mar 2022 – Sep 2022**

- Analyzed customer purchasing data to grow sales with existing accounts, **increasing sales 6%** (about USD 60K a year)
- Reviewed monthly budgets and import/export costs, **cutting operating costs 3%**; built supply chain planning models that **reduced lead times 15%**

EDUCATION

MBA, Business Analytics | University Canada West, Vancouver, BC **Apr 2022 – Dec 2023**

CGPA 3.53/4.33 · Coursework: Business Analytics, Predictive Analytics, Machine Learning, Cloud Computing · Peer Leader

BBA, Accounting | Leading University, Sylhet, Bangladesh **Jan 2017 – Feb 2021**

CGPA 3.67/4.00

CERTIFICATIONS

- Project Management Professional (PMP), Project Management Institute Mar 2026
- Microsoft Business Analyst Professional Certificate, Coursera Mar 2025
- Data and Business Process Modeling with Microsoft Visio · Requirements Gathering in Business Analysis
- Microsoft Azure Fundamentals (AZ-900) and Azure AI Fundamentals (AI-900), Microsoft 2023
